ABOUT

I design digital products that help businesses interact with users more effectively. My focus is on Product Design, UX/UI, User Flow, prototyping, design systems, and complex web/mobile scenarios.

Experience in e-commerce, AdTech, Entertainment, affiliate programs, user accounts, payment flows, CRM-like interfaces, and international markets. I dive deep into a product quickly, identify weak points in user journeys, and turn them into clear interface solutions.

Strengths: systems thinking, precise Figma work, designing complex scenarios, maintaining design systems, arguing decisions, and bringing designs to quality implementation in development.

WORK EXPERIENCE

AdCombo

Dec 2018 — Apr 2025 (6.5 years)

UX/UI Designer · Global CPA Ad Network & E-commerce ecosystem (USA, LATAM, EU, Asia)

- Designed and optimized e-commerce products, ad funnels, landing pages, and internal interfaces
- Increased conversion rates by 2-12% through funnel optimization: CTA, forms, visual hierarchy, mobile UX
- Created high-conversion user scenarios based on product metrics and user behavior
- Designed User Flows, screen structures, interface states, and key decision points
- Prototyped and wireframed in Figma to validate scenarios before development
- Designed interfaces for web and mobile with responsive design
- Built and maintained a Design System — reduced template preparation time by 20-30%
- Participated in product and marketing launches with focus on CR, CTR, bounce rate, completion rate
- Conducted design reviews and implementation QA — reduced design/production discrepancies by 15-20%
- Worked with product analytics (user behavior, scroll depth, heatmaps) to identify drop-off points
- Prepared layouts, specs, element states, and handoff materials for the frontend team

LETO

Sep 2016 — Sep 2018 (2 years)

UX/UI Designer · Entertainment, Gambling, and affiliate programs

- Redesigned key web services implementing modern UI standards — improved completion rate of registration and payment funnels
- Designed UX, User Flow, and information architecture for user accounts and payment scenarios
- A/B-tested key screens and scenarios — conversion uplift of 3-11% on target actions
- Developed UI for services with deep nesting and complex navigation
- Created responsive design for desktop and mobile
- Built interactive prototypes for early hypothesis validation — reduced post-launch rework by 15-25%
- Coordinated with developers from briefing to interface logic QA
- Created animated promo elements that increased session time and user engagement

ArtVisio

Jun 2015 — May 2016 (1 year)

UX/UI Designer · Branding agency & design studio, Saint Petersburg

- Designed responsive website and web service interfaces — helped clients grow mobile traffic share without conversion loss
- Developed visual concepts and UI guidelines — clients reported 15-25% increase in time on site
- Created UI, visual concepts, brand books, logos, and guidelines for digital products
- Defined page structure and User Flow, reducing unnecessary steps in user scenarios
- Created SVG graphics, animations, and visual content in Adobe After Effects and Cinema 4D
- Collaborated with developers and monitored precision of visual implementation

Quantron Systems

Apr 2014 — Mar 2015 (1 year)

UX Designer · Systems integration & custom software development, Saint Petersburg

- Designed UX prototypes for web and desktop applications
- Created User Flows for complex corporate scenarios and internal systems
- Built detailed prototypes and documented interaction logic — reduced time to complete key scenarios by 18-25%
- Worked with low/mid-fi prototypes for early solution validation (Axure, Balsamiq, Ninjamock)
- Prepared functional documentation and scenarios — sped up stakeholder alignment by 15-25%

SKILLS & TOOLS

Hard Skills

UX/UI Design: Interface design (Web & Mobile), responsive design, adaptive layouts
Systems Thinking: Dashboards, admin panels, complex CRM/B2B interfaces
Product Analytics: CJM, User Flow, UX research, competitor analysis, usability testing, A/B tests
Design Systems: Building and maintaining scalable UI kits and component libraries
Information Architecture: Complex structures, navigation, user scenario mapping

Tools

Design: Figma (components, variants, auto-layout, tokens, prototyping), Adobe Photoshop, Illustrator, After Effects
Technical: HTML/CSS basics, iOS Human Interface Guidelines, Android Material Design
AI workflow: Claude, Codex, Gemini — for research, UX writing, ideation, and process acceleration

Soft Skills

Communication: Presenting and arguing design decisions to stakeholders and engineering teams
Global Mindset: Experience working on international markets (USA, LATAM, EU, Asia)

Other

3D & Environment: Cinema 4D, Unreal Engine, World Machine (basic 3D + environment creation)

EDUCATION

Saint Petersburg State University of Telecommunications (SPbSUT)	2014
Information Systems and Technology — Bachelor's degree	
Cheboksary College of Telecommunications	2010
Computer Systems, Complexes and Networks — Technical diploma	

LANGUAGES

English: B2 — Upper Intermediate (IELTS 6.5)
Russian: Native
